Final demo script — approximately six minutes

1. 0:00–0:45: Explain the target audience and how hint-first tutoring differs from copying code.
2. 0:45–1:30: Show the 28-day CSV and explain the 5+7+13+5 minute session.
3. 1:30–2:30: Attempt an exercise, predict the answer, show the reference function and run tests.
4. 2:30–3:30: Run `python src/mini_project.py`. Enter oops, 50, 100, then done. Explain rejected input and the average of 75.
5. 3:30–4:15: Run `python automation/daily_draft.py --day 1`. Open the draft and show that no message was sent.
6. 4:15–5:00: Show the deck, quiz and common-mistakes article.
7. 5:00–6:00: Show genuine tool evidence and real pre/post data if collected. Otherwise explicitly state that these requirements remain unfinished. Discuss limitations and responsible AI.
