Weekly learning outcomes

Check an outcome only after demonstrating it without copying a solution.

Week 1

- [ ] Run a script and explain print output.
- [ ] Identify int, float, str and bool values.
- [ ] Convert an input string to an integer.
- [ ] Solve P01-P05 and explain at least three tests.

Week 2

- [ ] Use comparisons and if/elif/else correctly.
- [ ] Explain why range excludes its stop value.
- [ ] Trace a for loop and a terminating while loop.
- [ ] Solve P06-P10 and test boundary values.

Week 3

- [ ] Index and iterate over a list safely.
- [ ] Explain aliasing versus a shallow list copy.
- [ ] Use a dictionary for frequency counting.
- [ ] Define a function with parameters and a returned result.
- [ ] Solve P11-P15, including empty-input cases.

Week 4

- [ ] Catch the expected conversion exception.
- [ ] Break a small program into functions.
- [ ] Solve P16-P20 and explain invalid-input behavior.
- [ ] Run the complete test suite and interpret a failure.
- [ ] Demonstrate the mini-project, draft automation and final quiz.
